ABOUT ME

A Business Statistics graduate with practical experience in data analysis and market research. Interested in applying analytical thinking to support pricing strategy and logistics optimization. Skilled in Excel, SPSS, and R for processing and visualizing market trends. Passionate about turning data into insights that drive business decisions in e-commerce and logistics.

EXPERIENCE

YouNet Media – Data Analyst Intern

Oct 2024 – May 2024

- Managed and processed spam data from social media platforms
- Labeled and categorized data for analysis purposes
- Utilized the company's internal data processing system
- Participated in client projects such as J&T Express, GIZ Energy, and MB Ageas Life, supporting data extraction, cleansing, and dashboard creation for research and customer insight reports

District 1 Statistics Office – Data Validation Officer

May 2024 – July 2024

- Collected and validated large financial and demographic datasets
- Ensured data accuracy and prepared data for reporting.
- Collaborated with internal departments to support data-related needs

STUDY PROJECT

Co.op Food – Convenience Store Model Development

UEH Final Course Project | Sample size: 811 | Tools: Excel, SPSS, Charts, Correspondence Analysis.

- Analyzed consumer behavior and acceptance of the Co.op Food convenience store model in Ho Chi Minh City.
- Processed and analyzed quantitative survey data from households; applied Correspondence Analysis and data visualization to uncover customer insights, brand perception, and key factors influencing store choice.
